

Features & Benefits

Animal Intelligence (AI)™ was and is the first True SMART Electronic Medical Records practice management system. AI is the only medical records-centered practice management system in the industry. AI not only increases the excellence of your medicine by creating premier medical records, but it also increases doctor, staff and practice efficiency by fully integrating all features with our true SMART records.

The use of AI™ increases the bottom line of most practices by about 30% by reducing missed charges alone. Customized medical records, developed for each practitioner and each practice, create a fully integrated solution for your practice by linking medical records with estimates, invoicing, pharmacy, inventory, communications, laboratory, orders and treatments and more.

Features & Benefits

Full-service implementation and support for your practice.

- View client, patient and referral source information at a glance – and have the ability to see alerts quickly.
- Addresses the special needs of unique practices based on customization - specialty practices, general practices, mobile practices and unique settings.
- Develop AI for your unique practice needs.
- Relationship-based client support - we get to know you and your practice and maintain confidentiality.
- 24/7 emergency support at no additional cost.

Comprehensive and customized practice management and reporting.

- Customized inventory and referral sources for your practice.
- Customized report generator allows you to mine data from multiple areas of your practice, such as accounting, referrals, marketing, medical records and client and patient information.
- Individualized multiple security levels relative to staff function and desired accessibility.
- Inventory management.
- Virtually limitless appointment scheduler – allows you to book staff tasks, room or location time.

Fully customized SMART medical records – designed for each doctor or service to enable fully individualized true electronic medical records.

- 10 medical record specialty packs available for your customization.
- Virtually paperless medical records standard.
- Automated calculations within your medical records.
- Automatic generation of an invoice or estimate from a medical record.
- Automated and customized prescription labeling directly from the medical records.
- Fully customized, personalized and automated discharge and client instructions – designed to your practice specifications.
- Eliminates double entry and assures standard, yet customized, medical record entry.

Customized and detailed invoices and estimates.

- Linking features – virtually eliminates lost charges on linked billable items.
- Invoices link to estimates to track cost relations.
- Draft invoice printouts for clients to review
- Transfer estimates to invoices seamlessly.

Relational database – linking patient, client and referral source automatically.

- Virtually limitless database size.
- Solid, robust, stable database management eliminates data corruption.
- Emphasis on confidentiality and data protection.
- Ability to handle one practice site or multiple sites with one database in a LAN or WAN setting – from a single workstation to an unlimited number of workstations.
- Full access to your server and data – we are here to support you, not limit you.
- Easy data mining both for individual patients and your entire database.

Integration

- Ability to automatically fax communications from AI.
- Additional modules allow the system to easily integrate with
 - * In-house laboratory equipment
 - * QuickBooks
- Imaging functions allow you to draw on and save images, without impacting or changing the integrity of the original image.
- Comprehensive treatment and orders sheet module available - fully integrates orders and treatments into the medical records and billing in real time.

AI is INTUITIVE, USER FRIENDLY & FUN TO USE
...so simple even a 2-legged animal can use it.

NO-INTEREST PAYMENT PLANS AVAILABLE.
Special incentives for new practices and unique situations.
