

AI Remote Suite™

The *AI Remote Suite™* eliminates the need to transport paper records to your remote locations. Through a quick and efficient *AI Remote Transfer Utility™*, all of the necessary client information and patient records are selected via the *Appointment Scheduler* and extracted directly from the main database.

This transfer file is then sent to the *Remote Computer* via a floppy disk, direct connection or even attached to an e-mail, and then imported into the temporary remote database. Should an unexpected patient walk in, no problem... call your home clinic and they can send additional transfer files.

Throughout the day, you are using the *AI Remote Application™* to update patient medical records, generate invoices, and print discharge instructions, just as if you were at your home clinic. When your day is done, simply create an export transfer file and send it to the home clinic where it is merged with the main database.

No need to ever travel back to the home hospital

Should you need to stay remote for several days or even weeks, your home clinic can continually provide you with the files necessary to practice in the field... indefinitely. No longer is there a need to travel back and forth between clinics, you are truly remote!

Eliminates Paper Records

- Electronic records are always available

Quick, Simple Data Transfer

- Eliminates unnecessary travel
- Use anywhere in the world

Seamless Integration

- Eliminates the need to transcribe or duplicate data entry
- Instant access to needed data at multiple locations
- Review past accounting and record information in the field

Accurate Medical Records

- Create/update complete medical records in the field
- Review and modify records at more than one location simultaneously

Practicing remote and paperless has never been easier.

Call today and see how the *AI Remote Suite™* gives you more quality time AND makes your practice more profitable and efficient.
